

## **Mr Driaan Bezuidenhout**

### **Mintek**

Driaan is 24 years old and hold a degree in Mechanical Engineering. He started working at Mintek in 2017 and has been working in the Pyrometallurgy Division at Mintek for the past year. Mintek is a research institute serving the extensive mineral processing and metallurgical industry in South Africa.

Driaan has mostly been involved in designing and manufacturing experimental equipment for both experimental test work and model validation. Driaan is particularly interested in Renewable energy applications in the Mining industry and is focusing his research in that direction. He hopes to improve his design capabilities by making use of computational modelling.
