

Prof Tahir Pillay is Chief Specialist, Professor and Head of the Department of Chemical Pathology, University of Pretoria and National Health Laboratory service, Steve Biko Academic Hospital and Director of the Division of Clinical Pathology and Clinical Pathology training programme. He was also previously head of Chemical Pathology at the University of Cape Town and Deputy Vice Chancellor at the University of KwaZulu-Natal; Deputy Director, Institute of Cell Signalling, University of Nottingham, UK. He is President of the South African Association for Clinical Biochemistry and Laboratory Medicine.

He is also Editor-in-Chief of the London-based BMJ group journal, *Journal of Clinical Pathology* and a member of the Communications and Publication Division (CPD) executive committee of the International Federation of Clinical Chemistry and Laboratory medicine (IFCC) and a member of the International Committee of the Royal College of Pathologists, London as well as being country advisor to the Royal College of Pathologists. He is also a member of the Publications Core Committee of the American Association of Clinical Chemistry, the only member of any AACC committees from outside North America.

Prof Pillay graduated MBChB cum laude from the University of Natal in the 1980s. He obtained a PhD in biochemistry from the University of Cambridge and completed his postgraduate specialist training at Hammersmith Hospital, Imperial College, London and postdoctoral training at the University of California San Diego. He is a Fellow of the Royal College of Pathologists and the College of Pathologists, South Africa. He has been the recipient of numerous awards, including the Juvenile Diabetes International Fellowship, the American Foundation of Clinical Research outstanding postdoctoral award, the Wellcome Trust Senior Clinical Fellowship, Professors Prize from the Association for Clinical Biochemistry, UK and the Senior Researcher award from the South African Association for Clinical Biochemistry. Prof Pillay's research and extensive publications span the area of the molecular cell biology of insulin signalling, the cell biology of insulin resistance, molecular modelling of ligand-receptor complexes and development of new diagnostic probes for point-of-care testing using recombinant DNA technology. He is also the author or principal author of two acclaimed textbooks in laboratory medicine that have been recently published in 51 countries; "*Practical Clinical Chemistry: core concepts*" and "*Interactive Mathematics for Laboratory Medicine*".
