Century City Conference Centre,  
Cape Town, South Africa

2 – 6 December 2018

## SPONSORSHIP AGREEMENT

---

# Cyber Security Challenge

# SANReN

South African National  
Research Network

## ➔ **Background to the Conference**

### **CHPC CONFERENCE**

2-6 December 2018

Century City Conference Centre

Cape Town, South Africa

The CHPC National Conference is an opportunity for HPC consumers and industry to converge and discuss the latest developments and innovations in this fast-paced industry. As HPC extends to all corners of competitive industry and drives research initiatives in academia, the CHPC National Conference is the foremost platform for interaction and knowledge sharing in the technology and innovation space and a lucrative launchpad for vendors seeking to showcase their latest offerings.

## ➔ **Cyber Security Challenge**

The Cyber Security Challenge brings together the best information security students in South Africa to compete against each other in the following type challenges: penetration testing, incident response, digital forensics, and cryptography. We are preparing the next generation of white hat hackers.

### **OUR ZONES**

- 1. MAIN PLENARY ZONE** – This is where captains in HPC industry and academia from around the world share their knowledge and experiences and projections for the HPC of tomorrow.
- 2. WORKSHOPS ZONE** – These dynamic, parallel spaces will allow vibrant discussions on the various topics encompassed in high performance computing. Delegates will have the opportunity to interact and engage in discussions with presenters and with each other.
- 3. EXPO ZONE** – Designed to showcase solutions by leading technology companies; this zone is targeted at a diverse audience of businesses, government and consumers.
- 4. CONNECTION ZONE** – This collaborative space will allow sponsors to connect in private discussions.

### **WHY SPONSOR?**

At the CHPC national Conference, students and professionals from High Performance Computing, Computer Networks, and Big Data will be gathering. This provides an excellent opportunity to promote your brand to a wide variety of ICT related professionals in the academic sector. Additionally, you will gain direct exposure to students who are interested in information security during the Cyber Security Games. These students will be the Information Security specialists and decision makers of the future.

## ➔ Sponsorship Opportunities

We offer a range of sponsorship opportunities designed to meet your needs and resources.

Your exhibition will extend through the hundreds of attendees over the five-day event and will allow us to sponsor a number of students in our quest to build the Information Security pipeline in South Africa and Africa.

The CHPC may request that a sponsor's commitment be in kind for the same value, where the centre may request that a sponsor directly cover an international speaker's return flights.
