

Prof Ponnadurai Ramasami
University of Mauritius

Prof. Ponnadurai Ramasami received his PhD in Physical Chemistry and became full Professor in 2013. He leads the Computational Chemistry Group, Department of Chemistry, Faculty of Science at the University of Mauritius. The research group focuses on the use of computational methods to solve chemistry and interdisciplinary problems.

The group is particularly interested to collaborate with experimentalists and try to use computational methods to complement experimental research. He has already published about 250 research papers in peer-reviewed journals. Several publications deal with theoretical studies on structure of complexes and relating biological studies to theoretical modeling.
