CHPC CONFERENCE SPONSORSHIP AGREEMENT

30 November - 3 December 2025

The CHPC National Conference is an opportunity for Cyber-Infrastructure (high performance computing, network and storage systems) consumers and industry to converge and discuss the latest developments and innovations in this fast-paced industry.

As cyber-infrastructure extends to all corners of competitive industry and drives research initiatives in academia, the CHPC National Conference is the foremost platform for interaction and knowledge sharing in the technology and innovation space and a lucrative launchpad for vendors seeking to showcase their latest offerings.

→ Our zones

1. **MAIN PLENARY ZONE** This is where captains in Cyber-Infrastructure (CI) industry and academia from around the world share their knowledge and experiences and projections for the industry of tomorrow.
2. **PARALLEL ZONES** These dynamic, parallel spaces will allow vibrant discussions on the various topics encompassed in computing, network and data storage systems, research and services. Delegates will have the opportunity to interact and engage in discussions with presenters and with each other.
3. **EXPO ZONE** This area is designed to showcase solutions by leading technology companies; this zone is targeted at a diverse audience of businesses, government and consumers. The zone will also host three student computing competitions and poster zone.
4. **CONNECTION ZONE** This collaborative space will allow sponsors to connect in private discussions.

→ Why sponsor

The CHPC National Conference is one of the few CI gatherings in the Southern Hemisphere and an excellent opportunity for suppliers of CI solutions to meet consumers.

The meeting brings together industry and academic users as well as potential users. The SADC Partnership Forum will form part of the conference and will work on the HPC Framework for the SADC region.

The industry session is a plenary session and will feature sponsors responding to questions regarding their services/products. These are companies with interest in the booming African CI market.

→ Sponsorship Opportunities

We offer a range of sponsorship opportunities designed to meet your needs and resources.

Your exhibition will extend through the hundreds of attendees over the four-day event and will allow us to sponsor a number of students in our quest to build the CI pipeline in South African and Africa. The CHPC may request that a sponsor's commitment be in kind for the same value, where the centre may request that a sponsor directly cover an international speaker's return flights, conferencing items such as, a master of ceremonies or entertainment.
